SUMMARY

AI and Machine Learning Engineer experienced across computer vision, data science, backend development, and Generative AI. Built end-to-end systems spanning explainable ML, production MLOps platforms, and locally-deployed RAG applications in Python and Rust.

TECHNICAL SKILLS

Programming Languages: Python, Rust, SQL, C++, JavaScript

Frameworks & Libraries: PyTorch, scikit-learn, XGBoost, LightGBM, CatBoost, Hugging Face, OpenCV, FastAPI, Flask, Streamlit, MLflow, SHAP, LIME, Axum

Tools & Platforms: Docker, Git, GitHub Actions, Linux, PostgreSQL, Prometheus, Grafana, Ollama

Concepts: Machine Learning, Deep Learning, Computer Vision, LLMs & RAG, Explainable AI, MLOps, Data Structures & Algorithms, REST APIs, CI/CD

EDUCATION

Arab Academy for Science, Technology & Maritime Transport

B.Sc. in Artificial Intelligence (Data Science)

Alexandria, Egypt

Jan 2025

EXPERIENCE

Database Developer (Military Service)

2025 - 2026

Egyptian Armed Forces

Egypt

- Designed a centralized personnel database (records, service history, evaluations) and a recommendation system matching personnel to optimal placements from skill profiles
- Managed the full data lifecycle — collection, validation, querying — ensuring data integrity across hundreds of records

AI Tutor & LLM Specialist

Nov 2024 - Mar 2025

Outlier

Remote

- Engineered precise instructions guiding large language models through mathematical proofs and algorithmic problems
- Evaluated and refined AI guidance strategies by reviewing peer-submitted prompts, developing best practices for optimal model performance
- Diagnosed and corrected model misinterpretations through systematic analysis of LLM error patterns

PROJECTS

NorwoodVision – Hair Loss Diagnostic Platform | *Computer Vision, Edge AI, Capstone*

- Built a privacy-first, edge-computing capstone platform staging hair loss on the Norwood-Hamilton and Ludwig scales from 11,000+ clinical images, with guided client-side multi-view capture

Explainable Credit Scoring System | *Data Science, XGBoost, SHAP/LIME, Streamlit*

- Trained an XGBoost/LightGBM/CatBoost ensemble on 215K+ loan applications (0.76 ROC-AUC) with SHAP/LIME explanations, fairness audits across gender and age, and a six-page Streamlit dashboard

Enterprise MLOps Platform | *MLOps, FastAPI, MLflow, Prometheus, Docker*

- Unified experiment tracking, a versioned model registry, drift detection (PSI/KS), automated retraining, A/B testing, and Prometheus/Grafana monitoring; served via FastAPI with Docker Compose and GitHub Actions CI

Financial RAG Analyzer in Rust | *GenAI, RAG, Rust, Axum, Ollama*

- Developed a production-grade RAG service in pure Rust (Axum/Tokio) answering questions over 10-K financial reports with a locally-hosted LLM (llama3.1:8b)
- Implemented JWT authentication, per-user rate limiting, an async document queue, SSE token streaming, and persistent vector storage (redb); packaged with multi-stage Docker builds and docker-compose including the Ollama backend

CERTIFICATIONS

IELTS Academic – Overall Band 7.5 (CEFR C1)

Apr 2026

L 8.0 | R 9.0 | W 6.0 | S 6.5

Introduction to Artificial Intelligence & Applications (50 Training Hours)

Aug 2023

Zewail City of Science and Technology

Computer Science and Artificial Intelligence Summer School

Jul 2022

Universitat Autònoma de Barcelona & AASTMT
